

Amazing Tornadoes

Do you know how tornadoes form? The clouds build up and the cold air and hot

air come together and it makes the air spin. It makes the sky dark and if the air spins and touches the ground it makes a tornado. Tornadoes can make hail and it is very dangerous to buildings.⁴⁵

When Tornado Is Happening

How to know when a tornado is happening

dogs will start barking, cats start hiding and that's how you know when a tornado starts.

Fun Fact

Fun fact if a tornado looks like it's not moving it's moving at you. You should seek shelter. When a tornado touches the sea it makes a water spout. Tornadoes form in thunderstorms and it makes the air spin. It makes funnels if the funnels touch the ground it makes a tornado. Tornadoes occur all over the world like the USA. In addition, all tornadoes come from Texas, Ohio, South Dakota, and Mississippi.

Tornadoes Damage

Tornadoes can cause a lot of damage to tall buildings because tornadoes are big and big buildings can fall down on people. And if people were in the building when the building was falling down they could get very hurt.

In conclusion i haven't been in a tornado but the people that have im sorry.
