

## CHAPTER 1 Bring Your Pet To Work Day

Hi! My name is Max. I am 26 years old and 20 years ago me and my dad went to go for a swim, and I found a special narwal in the Great Lakes. My dad let me keep it and the best part is that my narwal does not need water! I named him Spark. I have had him ever since! I work for emergency management at Michigan state police ( MSP ) and they are having a bring your pet to work day and I'm going to bring Spark. I suspect there to be dogs and cats so I will be the odd one out but that's okay. The next day is "Bring Your Pet to Work" day and I go to McDonalds for some breakfast at 8am. At 8:15 am I walk through the doors with Spark. At 9 am, I have a meeting. I bring Spark with me, and I have not shown anybody Spark in my office, so I was a little bit scared. As soon as I got in there I was fired! John said, "that is not an actual pet" then he screamed " THIS IS A VERY IMPORTANT JOB YOU CANT JUST BRING IN SOMETHING THATS FUNNY WHEN YOUR SUPPOSED TO BE WORKING!" I started to fast walk when I saw John's golden retrievers chasing after me, I was running as fast as I could, but they didn't stop chasing me until they saw Stacy's cats. I was not mad at Spark, I kept him.

## CHAPTER 2 Time Travel

Since I had just lost my job, I was poor. My friend told me that in 1956, a billionaire named Mr. Robinson had buried 12 million dollars in the dirt of Massachusetts. Me and Spark pack our bags and headed to Massachusetts. They signed into their hotel and make a time machine. BOOM! They travel to 1956, and then they find the 12 million dollars. What they did not know was that they were able to make it there, but they did not have a way to time travel back. At that time, the only tech that they had was an airplane and it's not your nice clean airplane like you have nowadays. A few days pass by and Max reads in a newspaper that a time travel device was found on Mount Everest! Since they had already found the 12 million dollars, they paid for a flight to Nepal!

## CHAPTER 3 Climbing (not really)

We hoped on the plane and while we were flying, we found out that the pilot could not speak English. When I said Nepal, he thought that I said Antarctica, so I was in Antarctica for 50 days. When I was climbing on day 51, Spark and I, found a robot! I met the robot, and I asked him how did this happen in 1956? He tells me that he is from the future and my maker wanted to time travel. He needed a test to see if it will work and he sent me to Antarctica. When he pushed me through, I did not go into the future, I went into the past. I told him our story; he says that he has a jetpack, and I can bring you to Nepal. He gives me the jetpack and it takes about an hour since it's a little rusty. Afterwards, Spark and I go to the climbing store and get our supplies. While packing up our supplies, we are not leaving.

## CHAPTER 4 Climbing

After we got our supplies, we started to climb for hours and then we set up camp for the night. In the morning, the supplies were getting low, but we keep pushing through. We finally made it to the top, but it was not there. It was on the other side of the mountain. The time machine brought everyone from 1956 to present day and everyone from present day to 1956. He stopped time for more than 1 month and everything in 1956 went to present day so when I saw the robot I got worried.

## CHAPTER 5 The World Turned Upside Down

It's been crazy, the only thing that people talk about is how did we get here and who is to blame for this? In 1956 everyone was confused, they knew they were not in the right area. As papers fly from the sky, Spark grabbed one. It said that time will collapse if the survivor would not come to the sky. He suspects that it is him, but Max said "no that cant be true" so they put their mind on something else. Out of nowhere they start to see a flying ship in the air.

## CHAPTER 6 Narwal Alien Invasion

Max sees his lifetime friend get beamed up into space by aliens. Max was by himself. Then he remembers that the robot he met had a jetpack. When he went back into the present, he saw him, so he tries to find him. He does find him so he says "Spark was stolen by aliens could you help me?" The robot nodded and Max gets on the back of the robot. He blasts off with all his might and before they know it, they're in space. There is a lot of light, but Max can tell that his pet narwal is feeling the darkness and coldness. Max feels like he is starting to let him down, but he knows that he can't.

## CHAPTER 7 Goodbye

We get to the secret base. I see three narwals Spark, one with a crown, and one next to Spark. They said your world will get destroyed if you do not leave. They then tell me a story. They say that when spark was born, he was walking, and he fell into the Great Lakes. When you met him, you kept him for twenty years then you time traveled. I tried to send messages to you. And now were here. So, you leave or you and everyone in your world will die. It was hard, but I said goodbye and the robot brought me down.

## Good Ending

After I land back to the earth, I see my old boss and my friends. Time goes back to 1956. I see something in the sky. It was Spark, they pushed him, and he was falling. He would die so the robot saves him. After the robot drops him

off to Max, he flew up into the stars and dropped his parents. The robot did not pick them up but the narwals use their powers to fly back. The robot breaks their crown, and they fall. So, the robot flew, and papers came down. They said hello Max, I am the new timekeeper, so you do not have to worry. The narwals might have done a bad thing but they had a pretty bad past. He said that they started just having fun one day and the animal police came and said that they were accused of stealing the dolphin, Pearl. They went to jail and their parents were happy that they went to jail. Once they had a kid, they pushed off Spark where he was better off when he fell. They were jealous and wanted revenge. So, the robots told everyone to be nice to them and so Max and Spark did. Now everyone's happy and MSP let Max come back to work even knowing that they dug up 12 million dollars in 1956 and spent it. So, it is a good ending.

THE END
